NICARAGUA/CIA>JENNINGS: There was a new call today for an investigation <  
>MANUAL>into a reported CIA manual used to instruct antigovernment  
Nicaraguan forces in terrorist techniques. Sen. Patrick  
Moynihan, who is vice chairman of the Senate Select  
Committee on Intelligence, has asked CIA officials to  
report by Friday what they know about the publication.  
The 44-page booklet is called 'Psychological Operations in  
Guerrilla Warfare,' and among other things, it explains  
how to kidnap and assassinate public officials, blow up  
public buildings and blackmail ordinary citizens. The CIA  
said it would cooperate with Moynihan's request.
